

# 10 REASONS TO FEED

**HORSLYX™**  
BALANCERS

**1** Horslyx is a range of six equine feed balancers **packed with vitamins, minerals, and trace elements.**

**2** All Horslyx Balancers are **low in starch.**

**3** Horslyx Balancers provide a **low sugar intake**. A typical 500kg horse will consume 10kg of grass per day which contains around 2kg of sugar, or 10kg of hay per day which contains around 1kg of sugar. The same horse will consume around 250g of Horslyx per day, which only contains 82.5g of sugar.

**4 Cost-effective feeding** – providing a Horslyx Balancer and the correct amount of good quality forage allows the quantities of hard feed to be reduced.

**5** Horslyx Balancers contain **no chemical hardeners, artificial preservatives or colours** and are weatherproof, so are suitable for the stable or in the field.

A dark-colored horse with a prominent white blaze on its face is looking out from a stable stall. The stall has a metal frame and wooden panels. A blue towel is hanging on the left side of the stall door, and a smaller blue cloth is hanging from the bottom of the door. The horse's head is resting on the metal bars of the stall.

**6** A horse's welfare is improved with natural trickle-feeding patterns. Licking takes patience, helping to reduce boredom and stress while promoting digestive tract health.

**7** All balancers include high levels of **Biotin** and the essential amino acids Methionine and Chelated Zinc to help promote healthy hooves.

**8** Linseed oil features in all Horslyx Balancers to help promote **healthy skin and coat**. As well as boosting the immune system, you'll soon notice "The Horslyx Shine".

**9** Horslyx supports ethical sport and constantly monitors for the presence of specified Naturally Occurring Prohibited Substances (NOPS) as required under the rules of racing and affiliated competitions. Horslyx is proud to meet the requirements of the strict **BETA NOPS Code** to help improve traceability and to help control prohibited substances.

**10** There are six Horslyx Balancers, each containing specific **extra ingredients** to address different requirements. Respiratory support, joint care, gut support, appetite stimulant and biting insect protection.
